Art Unit: 2871

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4, 5, 8, 9, 13, 15, 16, 19, 20, 25 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohta et al (US 6,266,116) in view of Masaki (US 4,653,859).

Amended claims 5 and 16 exclude polyimide as the first alignment layer. Thus, the only difference between the in-plane switching mode liquid crystal display device of Ohta'116 and that of the instant claims is the first alignment layer comprising one of polyamide, SiO<sub>2</sub>, polyvinylalcohol (PVA) and polyamic acid. See discussions of Ohta'116 regarding the recited features in the last Office action. Masaki discloses that it was common in the art to employ PVA, SiO<sub>2</sub> and polyamic acid as the alignment layer (col. 4, lines 5-12; col. 5, lines 1-62). Thus, it would have been obvious to a person of ordinary skill in the art to employ PVA, SiO<sub>2</sub> and polyamic acid as the alignment layers in Ohta's device and method because these alignment materials are art-recognized equivalents for the same purpose, as disclosed by Masaki.

Applicant's arguments with respect to amended claims 5 and 16 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2871

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
